## 1 QUESTIONS

### 1.1 HOW IS YOUR CONSOLE LIKE THE ANCIENT TTY SUBSYSTEM IN UNIX AS DESCRIBED IN [HTTPS://WWW.LINUSAKESSON.NET/PROGRAMMING/TTY/](https://www.linusakesson.net/programming/tty/) ?

My console is like the TTY subsystem because they both have commands, and processes and each process has states. The states are very similar if not the same as the states I use.
